EXPERIENCE & PROJECTS

1. WORK EXPERIENCE:

Title : Real Estate.

Platform Used: Codeigniter

Role : Php Web Developer

Description : This is a website in which I have to manage all the backend functionality of the web app. I had to implement the Stripe Payment gateway using the Curl method.I was given the task to manage the whole user management module as well as the database handling.

Title : Global Tamil Matrimonial.

Url : www.globaltamilmatrimonial.com

Platform Used: Codeigniter

Role : Php Web Developer

Description : This is a website which was used for matrimonial match making. In this we were given the task to create a system for user to user interaction and connection making according to the likes and dislikes. The key point in this project was we had to create a chat system of multiple user so that they can connect to each other without any delay which was achieved by the help of Firebase real Time database to manage the details and messaging to the user and for notification purpose.

Title : **Cryptoloins.**
URL : **www.cryptoloins.com**
Platform Used: Codeigniter
Role : Php Web Developer
Description : A project was based on crypto-currency in which I had to manage all admin panel as well as the frontend tasks and all the data handling which was coming from different platform and API's in this all the data should be used in JSON format and merge all the ico's data.

Title : **Fine Lines Design.**
Platform Used: Php Core
Role : Php Developer
Description : In this I was assigned the task to manage the admin panel and to create web services for the android and ios applications. In this we used intuitive payment gateway for purchase and selling.

Title : **Coinygn.**
Url : **http://www.coinygn.com/**
Platform Used: Php Core
Role : Php Developer
Description : This site is used for buying and selling of the bitcoins and I had to manage the backend functionality and all the calculations part in it.

Title : **World Token Index.**
Url : **http://worldtokenindex.com/**
Platform Used: Php Core
Role : Php Developer
Description : This site is used for showing the list of current market price of the crypto-currency and I had to manage the list.

Title : **CrowdMention.**
Platform Used: Code Igniter
Role : Php Developer
Description : This site is used for showing twitter details of the users to the admin for analysis of the growth of each user and the posts done by the and increase in the followers and conversation ratio.

Title. : **TheNatalTV**
Url. : **Https://thenatinaltv.com**
Platform Used : Code Igniter
Role : Php Developer
Description : This is a platform on which different news are broadcasted and the functionality is being saved and managed at the admin panel end the basic functioning was to showcase the data used by editors at the backend where they can provide video, Article, Blogs and reviews to each other. Basically it is based on customer to editor connection making and showcasing the thoughts of the editors to users.

SKILLS

- **Good** understanding of **RDMS** concepts **Like Constrains, Tables,** etc.,knowledge of writing **SQL Queries** and Database handling.
- Knowledge of HTML ,CSS
- Good knowledge in API Integration.
- Implemented Paayment gateways and Web Services.
