PROJECTS

Text-to-Voice Conversion Assistant

- Text to voice conversion assistant is based on practical demonstration of different services and architectures of AWS(Amazon Web Services).

- It has the functionality to convert text into 40+ different languages and voices. It also supports Hindi.
- It uses Lambda Functions of AWS, which make it a Server-Less Architecture system. It also uses the NonRDS Database DynamoDB provided by AWS.

Other Projects:

- Created a dynamic website using HTML5,CSS3 at front end and MongoDB at back end.
- Created a responsive website using Bootstrap.
- Designed an web application using NodeJS to displaying news using news API's.
- A Python GUI based project for Restaurant Management System.
- Created Kubernetes cluster in AWS using Kops and AWS services.
