04/2019 – 07/2019

Jaipur, India

Achievements/Tasks

- ETL Operations
- Data cleansing
- Perform EDA operations
- Insights from Data sets

Mentor: Vijay Kumar – Vijay.sharma@celebaltech.com

PERSONAL PROJECTS

AI Voice Analyst (Ongoing)

- AI Voice Analyst is a virtual analyst that can any user can use to perform quick quantitative analysis in the simplest possible way. In this we can simply use our voice to talk to it or chat with it.

Twitter Sentiment Analysis (05/2019 – 06/2019)

- I use and compare various different methods for sentiment analysis on tweets (a binary classification problem). The training dataset is expected to be a CSV file of type tweet_id, sentiment, tweet where the tweet_id is a unique integer identifying the tweet, sentiment is either 1 (positive) or 0 (negative), and tweet is the tweet enclosed in "". Similarly, the test dataset is a CSV file of type tweet_id, tweet. Please note that CSV headers are not expected and should be removed from the training and test datasets.

Bank Management System (09/2018 – 12/2018)

- I create a desktop application of Bank management system to perform the all banking operation using the C Programming.
